

Meizheng Meat, Eggs and Seafood Test

en.meizhengbio.com

MEIZHENG BIO-TECH

Meizheng is focused on food safety testing solutions and has developed multiple product lines for food safety testing, including rapid testing, microbiological testing, and lab testing solutions. Our solutions are targeted at food value chain stakeholders in various industries like grain, feed, dairy, honey, meat processing, distribution, etc. Our testing items cover biotoxin, heavy metal, vet drug residue, pesticide residue, nutrition, pathogen, etc.

Through years of development, Meizheng has set up 5 entities and 4 manufacturing sites in China, and has developed technological platforms including immunoassay, ELISA, sample preparation, microbiology, standard materials, automated instrument, etc. The company has passed ISO9001 quality management system, and has also set up a certified third party testing lab.

Meizheng is committed to provide fit-for-purpose food safety testing solutions. Various series products such as ToxinFast®, HMFAST®, AnticFast® and MicroFast® have been recognized by customers. Besides China, Meizheng products have been sold in over 20 countries like Russia, Belarus, France, United States, India, Vietnam, etc.

In 2019, Meizheng was incorporated into PerkinElmer, and has further expanded overseas network since then. Also, Meizheng has accelerated various products' certification process in AOAC and ILVO. In 2021, MicroFast® Aerobic Count Plate (AC) has obtained AOAC certificate.

For meat, eggs and seafood segment, our products cover rapid testing kits and instruments, enabling rapid detection of antibiotic residues, pesticide residues, illegal additives, hormones, and marine toxins.

Contents

Types of residues that can be detected	3
Lateral Flow Rapid Test Kits.....	5
ELISA Test Kits	9
Immunoaffinity Columns.....	13
MicroFast® Microbial Count Plates	15
Instruments	17

Types of residues that can be detected

Veterinary Drug Residues	
Sulfonamides	Sulfamethazine, etc.
Quinolones	Enrofloxacin, ofloxacin, etc.
Tetracyclines	Tetracycline, doxycycline, oxytetracycline, and chlortetracycline
Amphenicols	Chloramphenicol, florfenicol, and thiamphenicol
Aminoglycosides	Streptomycin, gentamicin, and neomycin
Macrolides	Tylosin and tilmicosin
Nitrofurans	Furaltadone, furazolidone, furantoin, and furacilin
Lincosamides	Lincomycin
Nitroimidazoles	Metronidazole and dimetridazole
Quinoline	Olaquinox metabolite
Beta-lactams	Penicillin G, etc.
Polypeptides	Colistin
Others	Nicarbazin, trimethoprim, diclazuril, and amantadine

Pesticide Residues

Carbendazim, fipronil, and sodium pentachlorophenol

Illegal Additives

Malachite green, clenbuterol, ractopamine, and salbutamol

Marine Toxins

Tetrodotoxin, Diarrhetic Shellfish Poison (DSP), and microcystin

Hormones

Dexamethasone, diethylstilbestrol

Lateral Flow Rapid Test Kits

Features

High sensitivity and accuracy, good stability

Fast detection, only 5-10 minutes for most samples

Low false positive rate, less than 5%, zero false negative rate

Manual operation, the results can be visual interpretation, or instrumental interpretation.

Lateral Flow Rapid Test Kits

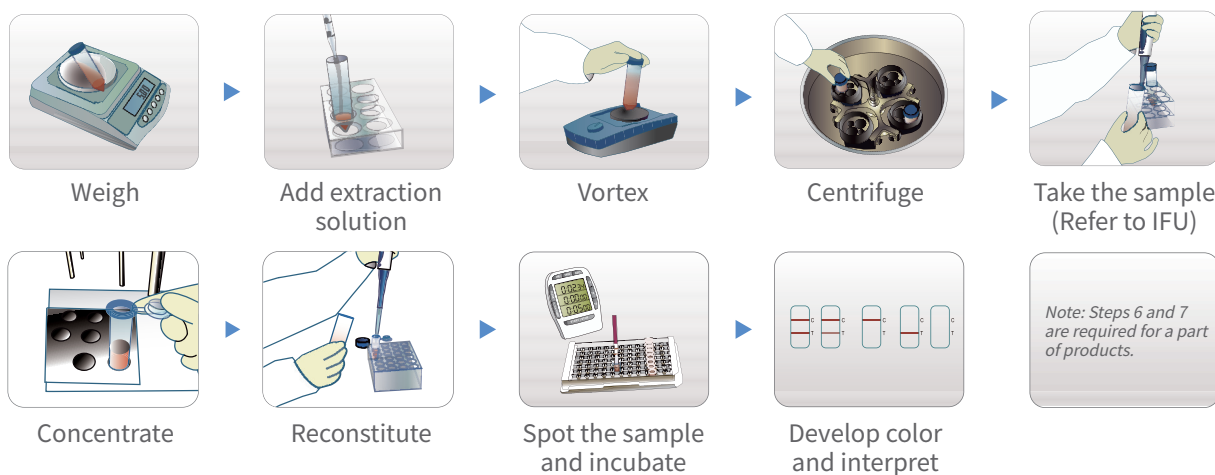

Reaction Principle

Lateral Flow Tests (LFTs), also known as lateral flow immunochromatographic assays or rapid tests, is an experimental technique based on the combination of Immune Colloidal Gold Technology and Antigen-Antibody reaction. LFTs are simple devices intended to detect the presence of a target substance in a liquid sample without the need for specialized and costly equipment.

The sample solution absorbed on the sample pad is wicked onto the NC membrane (nitrocellulose filter membrane). The target substance in the sample solution competes with the test line (T line) on the NC membrane for binding the gold conjugated antibodies. The presence of a target substance in the sample is qualitatively determined through the color contrast of C line and T line.

Test Procedure

Product Information

Detection Sample: Meat, egg and seafood

Storage: 2-8°C , keep away from sunlight and moisture.

Shelf life: 12 months.

Visual Interpretation

MQ46AER	Fipronil Rapid Test Kit	10	48T	Egg

ELISA Test Kits

Features

High sensitivity, detection limit is at ng/kg level

The test time for a single batch of samples is 50-60 minutes

The coefficient of variation is less than 10%, and the false positive rate is less than 5%

Only small equipment are required

ELISA Test Kits

Reaction Principle

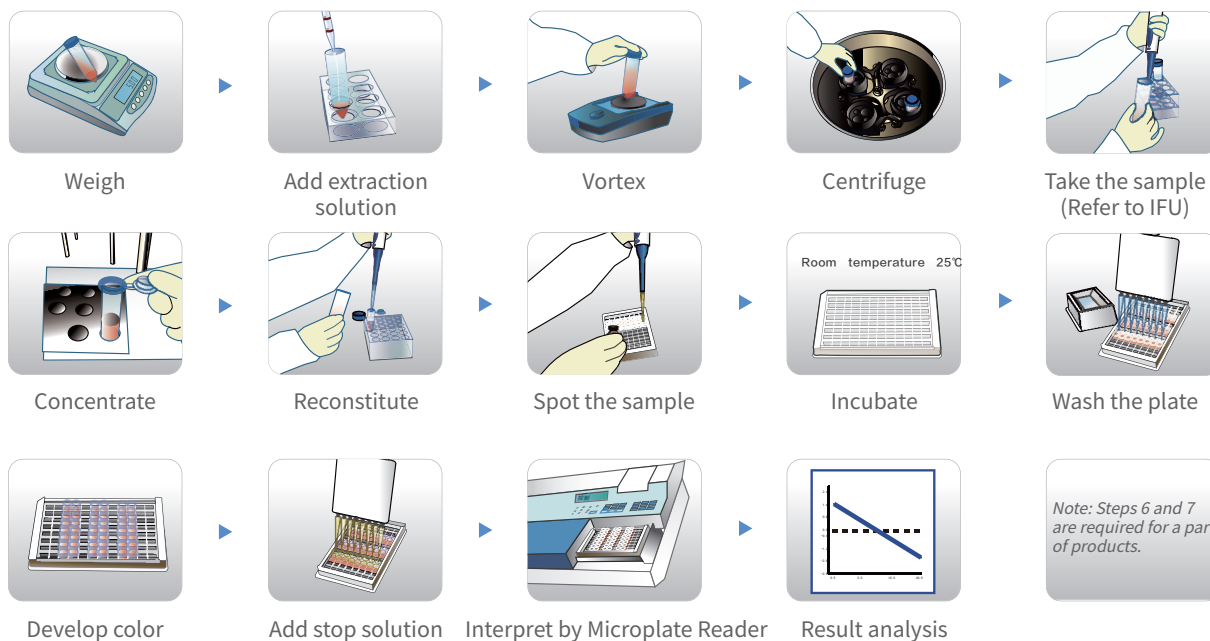

The Enzyme-linked Immunosorbent Assay (ELISA) is a common experimental technique based on immunological reaction with high sensitivity, which combines antigen-antibody (Ag-Ab) interactions and catalytic action on substance by enzyme.

Antigen-antibody interaction occurs in a polystyrene microtiter plate (a solid support). After incubating with the reagent, the unbound antibodies are removed by washing the plate to ensure the specificity and stability of the results. For competitive ELISA, the more antigen in the sample solution, the more Ag-Ab complexes are formed and so there are less unbound antibodies available to bind to the antigen coated in the well.

Test Procedure

Product Information

Detection Sample: Meat, egg and seafood

Storage: 2-8°C, keep away from sunlight and moisture.

Shelf life: 12 months.

For the specific detection samples, please refer to the user instructions or consult your sales representative.

Immunoaffinity Columns

Features

High specificity and precision

For complex samples

Immunoaffinity Columns

Reaction Principle

Immunoaffinity Columns (IAC) technology are based on a specific binding of the antigen to antibody-analyte, which can be used for purification and concentration of the target substance in a sample.

Immunoaffinity columns contain a gel bed with toxin-specific antibodies coupled to the gel particles. These antibodies will capture the target substance in a sample. The impurities which are not combined with antibodies will be washed out from the column. The target substance is recovered in the eluting solution to achieve the high-efficiency purification and concentration.

Detection Sample: Dairy product

Product List of Immunoaffinity Columns

Catalog No.	Product Name	Column Capacity (ng)	Specification	Detection Sample
QC0119	IAC for Tetrodotoxin	1000	3mL, 50T	Seafood
QC0183	IAC for Diarrhetic Shellfish Poison	400	3mL, 50T	Seafood
QC0201	IAC for Neurotoxic Shellfish Poison	1600	3mL, 50T	Seafood
QC0143	IAC for Microcystin	MC-LR: 500 MC-RR: 300	3mL, 25T	Water
QC0144	IAC for Microcystin	MC-LR 500 MC-RR 300	3mL, 50T	Water
QC0184	IAC for Olaquinox Metabolite	150	3mL, 25T	Animal originated food
QC0130	IAC for Olaquinox Metabolite	150	3mL, 50T	Animal originated food
QC0147	IAC for Aminoglycosides	2000	3mL, 25T	Animal originated food
QC0148	IAC for Aminoglycosides	2000	3mL, 50T	Animal originated food
QC0082	IAC 3-in-1 Diethylstilbestrol/Hexoestrol/Dienestrol	Diethylstilbestrol: 400 Hexoestrol: 200 Dienestrol: 100	3mL, 25T	Animal originated food
QC0083	IAC 3-in-1 Diethylstilbestrol/Hexoestrol/Dienestrol	Diethylstilbestrol: 400 Hexoestrol: 200 Dienestrol: 100	3mL, 50T	Animal originated food
QC0243	IAC for Ractopamine	500	6mL, 10T	Meat

MicroFast[®] Microbial Count Plates

Features

Precise and consistent results

Easy operation, work efficiency

Rapid diffusion technology

Intuitive observation

Microbial Count Plates

MicroFast® microbial count plate is a rapid and reliable microbial testing solutions, which can greatly improve the efficiency of laboratory testing and is widely accepted by enterprises.

Reliable results, Only 3 Steps

- **Inoculation** Lift the top film and add sample.
- **Incubation** Incubate the plates following the instruction.
- **Interpretation** Count the colonies.

Inoculation

Incubation

Interpretation

Catalog No.	Product Name	Specification(pieces/pack)
LR1001	Aerobic Count Plate	25
LR1002	Coliform Count Plate	25

Instruments

BMZ6000 Portable Strip Reader

- Small and portable
- Fast detection and stable operation
- Large capacity memory
- Thermal print function
- LCD touch screen, Android operating system, user-friendly

HF4500 Microplate Reader

- High definition display, small size
- Support TF card to expand memory
- WiFi module, connection to the laboratory information system supported
- The board can be arranged in rows, which is efficient and convenient
- Android operating system, mouse operation, keyboard operation and independent offline-work supported
